	<b>start</b>	<b>end</b>																																																								
<b>Sprint 0: Project Initialization</b>		<b>13/08/25 26/08/25</b>																																																								
<b>Week 2</b>		<b>13/08/25 19/08/25</b>																																																								
	Create GitHub Repository	13/08 13/08																																																								
	Create JIRA board	13/08 15/08																																																								
	Write initial README.md	13/08 19/08																																																								
	Create GitHub repo & folder structure	19/08 19/08																																																								
<b>Week 3</b>		<b>20/08/25 26/08/25</b>																																																								
	Draft Sprint Backlog for Sprint 0	20/08 24/08																																																								
	Finalize task distribution among team members	25/08 26/08																																																								
	Submit Sprint Backlog and JIRA Screenshot	26/08 26/08																																																								
<b>Sprint 1: Minimum Viable Features</b>		<b>27/08/25 09/09/25</b>																																																								
<b>Week 4</b>		<b>27/08/25 02/09/25</b>																																																								
	Define project scope	27/08 31/08																																																								
	Define core features	27/08 28/08																																																								
	Write Feature Descriptions	29/08 01/09																																																								
	Start developing initial demo features	27/08 02/09																																																								
	Core features defined	02/09 02/09																																																								
<b>Week 5</b>		<b>03/09/25 09/09/25</b>																																																								
	Design Mockups	03/09 06/09																																																								
	Define Functional & Non-functional requirements	03/09 06/09																																																								
	Design Database	03/09 06/09																																																								
	Project plan	03/09 06/09																																																								
	Write Project Proposal	03/09 09/09																																																								
	Project proposal completed	09/09 09/09																																																								
<b>Sprint 2: Feature Implementation</b>		<b>10/09/25 30/09/25</b>																																																								
<b>Week 6</b>		<b>10/09/25 16/09/25</b>																																																								
	Set up the project framework	10/09 12/09																																																								
	Implement Registration	12/09 14/09																																																								
	Implement Login	14/09 16/09																																																								
	User login and registration implemented	16/09 16/09																																																								
	Implement Password/Username Recovery	14/09 16/09																																																								
	Develop settings page	14/09 16/09																																																								
	Enable editing of personal information	14/09 16/09																																																								
<b>Week 7</b>		<b>17/09/25 23/09/25</b>																																																								
	Create Expense Record	17/09 19/09																																																								
	Modify Expense Record	19/09 20/09																																																								
	Delete Expense Record	19/09 20/09																																																								
	Expense record module completed	20/09 20/09																																																								
	Enable recurring expense logging	19/09 22/09																																																								
	Implement expense record search and filter	19/09 23/09																																																								
<b>Week 8</b>		<b>24/09/25 30/09/25</b>																																																								
	Generate expense reports	24/09 28/09																																																								
	Set spending goals	24/09 26/09																																																								
	Track spending goals	27/09 28/09																																																								
	Generate goal feedback reports	29/09 30/09																																																								
	Implement currency conversion	24/09 30/09																																																								
<b>Sprint 3: Feature Expansion, Testing &amp; Deployment</b>		<b>01/10/25 21/10/25</b>																																																								
<b>Week 9</b>		<b>01/10/25 07/10/25</b>																																																								
	Provide AI-based spending suggestions	01/10 04/10																																																								
	Display achievement list	01/10 03/10																																																								
	All core features completed	04/10 04/10																																																								
	Write unit tests for user authentication module	01/10 07/10																																																								
	Write unit tests for expense record operations	01/10 07/10																																																								
	Write unit tests for goal tracking and reporting logic	01/10 07/10																																																								
	Fix bugs identified during unit testing	01/10 07/10																																																								
	Unit tests completed	07/10 07/10																																																								
<b>Week 10</b>		<b>08/10/25 14/10/25</b>																																																								
	Perform integration testing for login and expense features	08/10 10/10																																																								
	Test interactions between goal tracking and AI suggestions	11/10 13/10																																																								
	Test UI responsiveness and form validation	11/10 13/10																																																								
	Fix integration issues and refine workflows	08/10 14/10																																																								
	Integration and UI testing completed	14/10 14/10																																																								
<b>Week 11</b>		<b>15/10/25 21/10/25</b>																																																								
	Deploy the app	15/10 18/10																																																								
	Conduct end-to-end walkthrough testing	19/10 21/10																																																								
	Prepare deployment documentation	17/10 21/10																																																								
	App deployed and tested	21/10 21/10																																																								
<b>Final Submission</b>		<b>22/10/25 05/11/25</b>																																																								
<b>Week 12</b>		<b>22/10/25 28/10/25</b>																																																								
	Prepare final presentation slides	22/10 27/10																																																								
	Prepare final presentation live demo	22/10 26/10																																																								
	Write final project report	22/10 28/10																																																								
<b>Week 13</b>		<b>29/10/25 05/11/25</b>																																																								
	Deliver final presentation	29/10 29/10																																																								
	Final presentation delivered	29/10 29/10																																																								
	Write and submit final report	30/10 05/11																																																								
	Final report submitted	05/11 05/11
